## DESIGN FOR Disability

### FEATURES OF THE VILLA

Affinity Design provides holiday accommodation for disabled people in a way that disabled people wouldn't normally experience. It is often the case that so-called 'accessible' accommodation is either lacking in equipment or in almost completely inaccessible locations....not the case in Denia.

Please see below a list of the equipment to date:

Profiling double bed (Hi-Lo electrically adjustable on right side)

Profiling single bed (Hi-Lo electrically adjustable)

Remote control air conditioning

Remote control radiators

Ceiling track hoist (double bedroom)

Mobile hoist

Shower Chair (Wheeled - Assistant)

Shower Chair (Wheeled - self-propelled)

Shower Chair (Fixed with adjustable height & lateral positioning)

Adjustable height grab rails

Pool hoist (1) (electric/sling type)

Pool hoist (2) (dipper/chair)

Wardrobe with pull-down rail (two mobile rails extraneous)

**Kitchen:** The kitchen is fully equipped including a washing machine and tumble dryer. It also contains an upright fridge/freezer with a small second fridge suitable for holding medications separately. It also contains the usual, ie, crockery and cutlery, T-towels etc.

**Bathrooms:** The villa has two bathrooms. The main bathroom is situated between the two bedrooms and is extensively equipped. A second bathroom is also accessible and also includes a grab rail.

**Bedrooms:** Apart from the equipment listed above, each bedroom has a 26" television and DVD player. Each bedroom also has its own air conditioning unit to allow microclimate control... one is a double bedroom and the other is a twin bedroom.

**Lounge area:** The lounge area includes a 32" LCD television together with a DVD player. Also provided is an 'iStation' for those people taking an iPod, capable of playing music or videos through the TV.

**Safe:** Adjacent to the lounge area is a wall cupboard that holds a safe with personal coding.

## DESIGN FOR Disability

- Dining area:** The dining area has a dining table with six chairs and is conveniently positioned next to the kitchen area.
- Pool area:** Our Denia villa has the great bonus of its own private pool which is almost a 'must' for disabled people who may be more aware than most of their dignity. Two types of pool hoist are provided. One hoist uses a spreader bar with netted sling and the other hoist allows the disabled person to sit in a plastic chair which is gently submerged into the water over the edge of the pool. Using the latter, a person can either remain in the chair or move off into the water.
- Terrace area:** The small terrace area is positioned by the pool with a door leading from the living area. A table, chairs and loungers are provided for this area.
- Parking area:** The electric gate exposes the small car parking area for a vehicle. It is possible to position the vehicle making a level transfer possible.
- Entrance:** The entrance is gently sloped from the pedestrian gate and the doorway has a total opening of one metre.
- Sockets:** In an effort to ensure that there is always an electrical socket available, this villa has a significant number available. This was deemed necessary to ensure that those people on ventilators would be able to connect and position their ventilators in the best possible place.
- Locality:** The area in which the villa is located is as flat as it possibly could be. It would be difficult for any person with a disability to find anywhere else more suited in this particular way.
